

My name is Ezra Kamanga and I am 25 years by age. I am the first born child in the family of 3 children. In 2015, I passed my Primary School Leaving Certificate of Education exams with good grades and got selected to Dzenza Secondary School, a district boarding school in Lilongwe district. However, it was a challenge to my family and relatives as they could not afford the cost of my education. My strong desire to be among friends at Dzenza and – later on – to become a doctor - was like an impossible dream. It was at this point of need that the Warm Heart for Malawi-foundation from the Netherlands came in with the good news that they would sponsor my education. This marked a beginning of my new academic journey and it brought a lot of joy and motivation to me and my family. With their financial and personal support, I performed well and in 2020 I successfully got enrolled in the College of Medicine in Lilongwe. I started with full energy as the Warm Heart for Malawi promised to continue supporting me. My tuition, accommodation fee, upkeep and studying gadgets were all provided. This has been standing as a reason why I have managed to cross the four levels of my studies without repeating any level. I heard that the Warm Heart for Malawi foundation has got a donation from the Rocks Foundation in order to support me financially for the next academic year.

I would like to thank you for helping me building a bright future. May good Lord sustain you as a sponsor even more as you are offering great support to me and other people in need.

Yours sincerely,

Ezra Kamanga
